Drawings

New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because the objected drawings from 1/26/2004 have the words replacement drawing scribbled across the figures (these should be visible in PAIR). Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Allowable Subject Matter

Claims 1-8 and 21 are allowed, renumbered as 1-9 for allowance.

The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the prior art discloses many authentication methods including finger image sensing, as well as the authentication of a terminal before that terminal before allowing that terminal to be activated or to access particular network functions. The present claims teach a system for enabling use of a computer terminal in a network to access or otherwise participate in at least one network-related function and a separate voice communication function over the network, comprising: a telephone handset including a microphone and a speaker coupled to provide signals to and receive signals from the computer terminal for the voice communication function; a finger-image sensor coupled at least to provide signals to the computer terminal relating to a finger-image sensed by the finger-image sensor; means for electronically authenticating a finger-image sensed by a finger-image sensor based on the finger-image-related signals provided to that computer terminal; means responsive to the authenticating means for

enabling the computer terminal in the network to participate in the voice communication function over the network at least from each computer terminal for which a sensed finger-image was authenticated and access over the network at least one function that is not related to and does not depend upon participation by the computer terminal in the voice communication function. When incorporating all of the limitations as claimed, none of the prior art discloses the features as claimed.

Claims 2-8 and 21 incorporate the allowable subject matter of claim 1 and are allowable only when incorporating all of the limitations of the parent claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
